Mkango Resources is 'incredibly excited' to discover new rutile and ilmenite in Malawi

Mkango Resources Ltd's (LON:MKA) (CVE:MKA) Alex Lemon talks to Proactive London about their operations in Malawi and their latest set of results.

Lemon explains how the findings show significant signs of titanium dioxide mineralisation in a soil sampling and auger drilling programme at its 869 square kilometre Mchinji licence in Malawi. He is now looking forward to completing the feasibility study.

The company has been working in Malawi for over twelve years and enjoys a 'very strong relationship with the current government, working hand in hand to bring its exploration projects into production, generating income and economic benefit to the country, it's people and Mkango resources'.
